The Village booking system: requirements and MVP

Oct 17, 2026 · @Jack

Ready for the development team (reviewed 20 October). Business rules are agreed; build details settled at review are under Business rules, and the few owner tasks left are under Open questions. Technical background is in Developer notes.

At a glance

The booking app is The Village - Family Club's own system for running classes and packs, ready for the opening on 14 November 2026. It has two parts that share one database:

- **Staff app:** managers and instructors run the timetable, customers, class and open play packs, bookings, attendance, private hire sessions and reports. It's designed and built from scratch for The Village.
- **Customer booking site:** parents log in on their phone with no password: they get a one-time code by email (WhatsApp and Zalo login once Meta and Zalo approve) and stay logged in on that phone. They can see sessions with spaces left, book or cancel with their pack credits, check their balance, and message the studio about private hire. It's in English and Vietnamese and opens from a QR code or a home-screen icon.

The website is a simple one-page site explaining the concept (Move, Connect, Belong). Its Book now button, the Facebook and Instagram links and the Google Maps listing all open the booking site. At launch there's no online payment and no app-store app: customers pay by cash, bank transfer or QR, and staff record the sale.

Decisions so far

Answers from the first review on 17 October.

Topic	Decision
Opening date	14 November 2026
Rooms	One room, so only one session can run at a time

Topic	Decision
Who books	Parents, mainly mums, book one place for themselves and can bring up to 2 children (decided 21 Oct). There is no separate child booking yet. Dads, expectant parents and families are welcome too. Classes cover Pilates, yoga, strength, fitness and dance. Children's classes, workshops (e.g. parenting, baby health and safety) and family events are planned for later
Capacity	Classes: 10 parents to start, each with up to 2 children. Open play: places are counted per child (maximum 10 children). Check the room fits 10 adults with their children, and review after the first weeks; capacity can be changed per session
Staff	The owners are Managers (2 to start). Instructors teach the classes (up to 4 to start, more later). One manager will also teach at first, so a manager can be both. Permissions agreed as proposed
Packages	Two kinds: class packs (one pack covers all regular classes), and open play packs at their own (likely lower) price. Sizes of 10, 20, 40 or 60 sessions. Single prices agreed: 400,000 VND a class, 150,000 VND per child for open play; pack prices to come. Prices, contents and promotions (e.g. buy 10, get 1 free) must be easy to change
Trials	A manager can give a customer a free trial class. Otherwise a first class is a normal single session at full price. New customers can also buy one intro pack: 3 classes for 750,000 VND (usually 1,200,000), set up as a promotion pack (M8)
Drop-ins	Pay the full single price: 400,000 VND for a class, 150,000 VND per child for open play. Bookable online, logged in or as a guest; a manager calls to confirm
Private hire	Renting the whole studio (e.g. a party or a group of families) in any slot without a class. Arranged by WhatsApp chat; no online hire booking
Payment	No online payment this year. Customers pay by cash, bank transfer or QR, and staff record it when they sell the package
Languages	English by default, with a Vietnamese switch.
Look and feel	Full name: The Village - Family Club (dash or colon still to pick), from the saying "it takes a village to raise a child". The site leans on that community idea. Logo and colours are still in development. Version 1 stays simple and pastel

Topic	Decision
Data	The Village has its own database; its customers and packages are never shared with any other system
Public website	A simple one-page site for The Village with a Book now button that opens the booking site. Facebook and Instagram link there too. Kept separate from the booking site (decided 18 Oct): thevillagesaigon.com for the website, book.thevillagesaigon.com for booking
Calendar sync	Wanted. Bookings should appear in Google Calendar or whatever calendar the person uses
Hosting	Vercel Pro for hosting, with the website and the booking app as two separate Vercel projects; Supabase for the database, with daily backups and a weekly Excel backup emailed to the managers (no point-in-time recovery for now); our own domain (decided 20 Oct)
How we build	Designed and built from scratch, not adapted from another app. Wireframes and visuals come first; the owners review and sign them off; only then does coding start. Claude Code sets up GitHub, Vercel and Supabase and guides the owners at each step (decided 20 Oct; see How we build in Developer notes)
Requirements	Two releases: opening day (14 November) and about two weeks later. Ideas for later are voted on separately. No App Store or Google Play app planned: the mobile site covers it
Wireframes	The sketches in this doc and the clickable mockup are inputs only; the final wireframes are made and signed off in the design phase (How we build, Developer notes)
Still to decide	Opening hours, pack prices and validity periods, buying thevillagesaigon.com. Business rules were agreed after the partners' meeting on Oct 18, 2026

Open questions

Owner decisions and tasks, as of 20 October. Tick each one off and note the answer.

- [x] ~~**Business rules:** fill in the "Your decision" column of the Business rules table. Answered: all 13 proposed rules agreed (20 October).~~
- [ ] **Opening hours.** These also set when private hire is possible.

- [ ] **First month's timetable:** which classes run, on which days and times, and with which instructor. In progress; the owners will share it when ready.
- [ ] **Prices and validity:** agreed so far: a single class is 400,000 VND and open play 150,000 VND per child. Still to set: class pack and open play pack prices (10, 20, 40, 60) and how long each pack is valid, the intro pack's validity, and private hire prices (or confirm hire is priced case by case in chat). Drop-ins are agreed at the single prices.
- [x] ~~**Class packs:** does one class pack cover every class type, or do some classes need their own pack? Answered: one class pack covers all regular classes. Workshops and events are priced separately (M7).~~
- [x] ~~**Private classes:** will The Village run private classes, and can customers book them online or only through staff? Answered: by DM for now, moved quickly to WhatsApp, until demand grows.~~
- [x] ~~**Drop-ins: can customers book a full-price single session** online, or only through staff? Answered: yes, customers book them online themselves, logged in or as a guest. Each one is flagged so a manager can call to confirm and avoid no-shows (S25).~~
- [ ] **Name and domain:** thevillagesaigon.com is available; buy it. Who writes or checks the Vietnamese wording?
- [ ] **Staff accounts:** names and emails for the 2 managers and the first instructors.
- [x] ~~**Login channel:** Answered 21 Oct: a 6-digit code sent by WhatsApp or Zalo to the parent's phone, typed or pasted in. WhatsApp first, Zalo once its Official Account is approved; email codes stay as the fallback; SMS optional later.~~
- [x] ~~**Cancellation cutoff time:** Answered 21 Oct: free cancellation until 20:00 the evening before the session.~~
- [x] ~~**Taking payment at the studio:** Answered 21 Oct: parents pay by QR code at check-in, before the session starts.~~
- [ ] **Policy wording:** privacy policy (B1) and cancellation policy (B2), in English and Vietnamese. Needed before the pilot.
- [ ] **Studio details for the site:** address, studio WhatsApp and Zalo numbers, Messenger link, Facebook and Instagram pages, and the email address emails come from.
- [ ] **Pictures:** class illustrations (C28) and website photos. Placeholders until supplied.

Business rules

The app enforces these automatically. All 13 were agreed on 20 October; two were changed after the mockup review on 21 October.

Rule	Proposed	Your decision
Free cancellation cutoff	20:00 the evening before the session (changed 21 Oct)	agree
Late cancellation (inside the cutoff)	Credit is used; staff can restore it	agree
No-show	Credit is used	agree
When a credit is taken	Reserved at booking, used once the class ends	agree
How far ahead customers can book	1 month	agree
Latest time to book	Up to 1 hour before the start	agree
Expired package	Can't book; staff can extend it	agree
Private hire lengths	1 or 2 hours, during set open hours (agreed in chat)	agree
Private hire notice	At least 24 hours ahead	agree
Private hire price	Agreed and paid in person at launch	agree
Who can become a customer	Staff add customers, or parents book as a guest on the website (C15) and an account is created for them	agree
Unpaid (pay on the day) bookings	Guests who aren't logged in: one unpaid booking at a time. Logged-in customers can book several dates and pay on the day. New customers and drop-ins are flagged for a manager to call (changed 21 Oct)	agree
Booking several dates	Customers pick dates one by one (for example every week or every two weeks) within the 1-month booking window. Nothing repeats automatically, so there is no series to stop (changed 21 Oct; replaces the rolling weekly booking and its cap)	agree

Build details

Settled at the final review on 20 October, so the developers don't have to guess. Owners can change any of these; the starred ones become studio settings with M9.

Topic	Rule
Guest booking (C15)	Name, phone (WhatsApp) and email are required; child details optional. Email is the login until WhatsApp and Zalo login are approved
Duplicate customers	A guest booking whose phone or email matches an existing customer is added to that customer, never a second account
Intro pack	3 class credits for 750,000 VND, one per customer, only for customers who haven't had a pack or paid class before. Sold by a manager in person, like any pack. Validity is set with the pack prices
Free trial (S15)	One per customer, given by a manager
Which credit is used	The pack that expires first, among packs that cover the session type and are still valid on the session date
Pack expiry	A booking can only use a pack that is valid on the session date, not just on the booking date
Instructors	Check people in and mark attendance, no-shows and late cancellations. Only managers record payments, sell packs, give trials and restore credits
Late cancellation by a customer	Inside the cutoff the Cancel button becomes "Message us" (C4); staff cancel it and the credit is used unless a manager restores it
Staff overrides	Staff can book outside the booking window and after the latest booking time, but never over capacity
Unpaid bookings	Guests who aren't logged in get one unpaid booking at a time. Logged-in customers can book several unpaid dates; new customers and drop-ins are still flagged (S25)

Topic	Rule
Time zone	All times are Vietnam time (Asia/Ho_Chi_Minh, UTC+7), including scheduled jobs
Reminder time*	Day-before reminders (C14) go out at 18:00
Staff app language	English at launch; the Vietnamese switch is for customers
People per booking	One parent and up to 2 children. Classes: one place and one credit (or 400,000 VND) per parent, children free. Open play: one place and one credit (or 150,000 VND) per child, up to 2 parents free (decided 21 Oct)
Late cancellation of an unpaid booking	No charge at launch, and no booking screen says "full price due". A late-cancellation fee is for phase 2
WhatsApp and Zalo login	The parent enters their phone number, gets a 6-digit code on WhatsApp or Zalo, and types or pastes it (decided 21 Oct)

Requirements

One table per type of user, sorted by release: 40 rows for opening day and 14 about two weeks later. Change a release with its dropdown.

Customers

#	User story	Requirement	Release	Notes
C1	As a customer, I want to log in with a code sent to my email, so that I don't have to remember a password	Log in with a 6-digit email code or a one-tap login link. Stay logged in on that phone until they log out (re-checked about once a year)	Opening day	
C30	As a parent who lives on WhatsApp or Zalo, I want to get my login code there, so that I don't have to dig through email	Log in by WhatsApp (expats) or Zalo (local parents): enter a phone number, get a 6-digit code on WhatsApp or Zalo, and type or paste it (decided 21 Oct; see WhatsApp and Zalo setup). The account is matched by phone number. Optional: SMS codes, which autofill	Opening day	As important as C1. Autofill only works for SMS codes (iPhone and Android) and email codes in the iPhone Mail app; WhatsApp and Zalo codes don't autofill on a website, so the parent types or pastes them (Meta's message has a Copy code button). Needs an approved WhatsApp Business account (Meta) and Zalo Official Account, each with a small fee per message; SMS needs a registered sender name in Vietnam. Apply now; if approval isn't through by 14 Nov, email codes cover opening day. Build: 6-digit code, 5-minute expiry, 5 tries, rate limits per phone; a correct code verifies the phone (Developer notes, Security and access)

#	User story	Requirement	Release	Notes
C2	As a customer, I want to see upcoming sessions and spaces left week by week, so that I can plan around my child's routine	See sessions with spaces left as a week list grouped by day, with previous and next week arrows and a filter for all, classes or open play. Day and month views are dropped (21 Oct). Phone-friendly, and shows as far ahead as the booking window allows. Opens with a greeting by name ("Hi Phuong")	Opening day	

#	User story	Requirement	Release	Notes
C3	As a customer, I want to book a session with my pack credit, so that my place is held without messaging the studio	Book a class with a class pack credit, or open play with an open play credit. A class booking is one parent with up to 2 children and uses one credit; open play uses one credit per child, with up to 2 parents free	Opening day	Blocked if full or no free credit. Guests get one "Pay on the day" booking at a time (C15); logged-in customers can book several. Customers can also book a full-price single session (drop-in) online, logged in or as a guest. It's marked "Pay on the day" and flagged for a manager to call (S25)
C4	As a customer, I want to cancel before the cutoff, so that I get my credit back when plans change	Cancel their own booking before the cutoff, which returns the credit	Opening day	After the cutoff, they contact staff
C5	As a customer, I want to see my upcoming and past bookings, so that I know where I need to be and when	See upcoming and past bookings	Opening day	

#	User story	Requirement	Release	Notes
C6	As a customer, I want to see my credits left, reserved and expiring, so that I know when to buy another pack	See credits left on each pack, credits reserved by bookings, and expiry dates	Opening day	
C8	As a customer, I want an email when I book or cancel, so that I have a record	Email confirmation of bookings and cancellations	Opening day	In the customer's language
C9	As a customer, I want to scan a QR code and save the site to my home screen, so that booking feels like opening an app	QR code in the studio, plus adding the site to the phone home screen	Opening day	Behaves like an app icon. Build: on iPhone the icon has its own login, separate from Safari (Developer notes, Tech stack)
C10	As a customer, I want the site in English or Vietnamese, so that I understand every step	English by default, with a Vietnamese switch, on the website, booking site and emails	Opening day	The studio supplies or checks the Vietnamese wording. Not a launch blocker: if translations aren't ready by 14 November, launch in English and switch Vietnamese on when ready (21 Oct)

#	User story	Requirement	Release	Notes
C15	As a new parent who finds The Village online, I want to book my first session straight away without creating an account or paying first, so that I don't lose interest waiting for the studio to reply	Book as a guest, with no login: name, phone (WhatsApp), email, optionally the child's name and month/year of birth (C22). The booking is confirmed straight away, marked "Pay on the day" and flagged for a manager to call (S25). An account is created in the background from the email and phone number (or the booking is added to the existing customer if either matches), so they can log in later to see bookings or buy a pack	Opening day	Guests get one unpaid booking at a time, matched by phone or email; once logged in they can book more. Email is required so confirmations, reminders and email-code login work from opening day. Manager side is S25. Build: Turnstile and rate limits on the form; never reveal that an account exists; the phone stays unverified until confirmed (Developer notes, Security and access)

#	User story	Requirement	Release	Notes
C20	As a parent, I want to see what a session involves and which ages it suits, so that I choose sessions that fit my child's stage	Session details: description, instructor, length, what to bring, suitable ages (babies, crawlers, toddlers)	Opening day	Set per class type, editable per session
C22	As a parent, I want to give my child's name and month and year of birth once, so that staff know who is coming and I don't type it again	Optional fields when booking: child's name and month/year of birth. Saved to the parent's profile and filled in automatically next time; editable there	Opening day	Optional, never required to book. No allergy or emergency contact details
C26	As a customer, I want to message the studio on the app I already use, so that I can ask a quick question easily	"Message us" buttons for Zalo, WhatsApp and Facebook Messenger	Opening day	Zalo for local customers, WhatsApp and Messenger for expats. Links only for now. Staff move chats to WhatsApp quickly so people don't drop off

#	User story	Requirement	Release	Notes
C14	As a customer, I want a reminder the day before my session, so that I don't forget and lose a credit	Reminder email the day before each booking, in the customer's language, with a link to cancel if still before the cutoff	Opening day	Covers every booking, including each date of a multi-date booking and those made by staff
C28	As a customer, I want each session to show a small picture of the activity, so that I can spot my kind of class at a glance	Each class type has an illustration (Pilates, yoga, dance and so on) shown on its session cards. Managers can upload or change it, and give one-off sessions their own	Opening day	Style: a parent and child doing the activity together, in the pastel look. The illustrations need to be drawn or bought; simple placeholders until then

#	User story	Requirement	Release	Notes
C29	As a parent who wants to hire the studio, I want to message the team straight away, so that we can agree a date in a quick chat	Private hire page with a short form (date, start time, 1 or 2 hours, group size) whose button opens WhatsApp, or Zalo, with the details pre-filled. States 24 hours' notice (21 Oct)	Opening day	Hire is arranged by chat; staff then add it to the calendar as a private hire session (S3). Nothing is stored or booked online
C11	As a customer, I want my bookings to appear in my own calendar, so that I don't forget a session	Bookings appear in their own calendar (Google, Apple or Outlook)	+2 weeks	
C19	As a customer, I want to keep my contact details and language up to date, so that the studio can reach me and emails arrive in my language	Update their own name, phone number and preferred language	+2 weeks	Until then, staff update details. Email changes always go through staff, because email is the login

#	User story	Requirement	Release	Notes
C25	As a regular, I want to book several dates of my class in one go, so that I don't have to rebook each time	When booking, choose "Just this time" or "Pick dates", then tick the dates wanted (any pattern, e.g. weekly or every two weeks) within the booking window. Each date is its own booking with its own credit and cancellation cutoff. Nothing repeats automatically (21 Oct)	+2 weeks	Dates without a valid credit are booked "Pay on the day". Staff can book several dates for a customer from opening day. The mockup already has this, so it could move to opening day if time allows

Staff and instructors

#	User story	Requirement	Release	Notes
S1	As a staff member, I want my own login with the right permissions, so that I see only what my role needs	Separate logins: 2 managers and up to 4 instructors, more later. A manager can also teach, with the instructor's session list and calendar. Roles are enforced in the database, not only by hiding pages; MFA for managers	Opening day	
S3	As a staff member, I want open play and private hire shown as their own session types, so that the calendar is clear at a glance	Open play and private hire as session types on the calendar. Day, week and month views, with drag to move	Opening day	
S12	As a staff member, I want to book a customer who asked by phone, chat or in person, so that they don't have to use the site themselves	Book a customer into a session on their behalf, from a phone in a few taps: open the session, search the customer's name, tap Book. If they're new, add them on the spot. Uses their pack credit, or marks "Pay on the day". Managers and instructors can both do this	Opening day	Expected to be the most common way bookings are made (e.g. a WhatsApp message to the instructor). The customer still gets the confirmation email

#	User story	Requirement	Release	Notes
S13	As a staff member, I want to record who came, who didn't and who cancelled late, and give a credit back when it's fair, so that balances match what really happened	Mark attendance, no-shows and late cancellations, and (managers only) restore a credit, recording who did it and why	Opening day	Each restore is recorded in the audit log
S16	As an instructor, I want today's session list on my phone and to tap people in as they arrive, so that I know who's here and attendance is right	Session list on a phone with check-in, showing each child's name and age, where given	Opening day	Shows "Pay on the day" for unpaid bookings. Instructors check people in only; a manager records payments
S21	As a staff member, I want to see and update a customer's child details on their profile, so that I can fill them in for people who book by phone	Profile shows the child's name and month/year of birth; staff can fill them in or update them	Opening day	No terms, waiver or photo consent is collected (cut from scope)
S22	As a staff member, I want to add and edit customers, including their email, so that new parents can start booking and login problems get fixed	Add, edit and deactivate customers. New customers get a welcome email, in their language, with the booking link	Opening day	

#	User story	Requirement	Release	Notes
S8	As an instructor, I want my sessions in my own calendar, so that I always know when I'm teaching	Each instructor's sessions in their own calendar	+2 weeks	
S24	As a staff member, I want to get back into my account if I forget my password, so that I'm not locked out before a class	Staff sign in with an email code, or managers reset passwords	+2 weeks	Until then, the developer resets passwords

Managers and owners

#	User story	Requirement	Release	Notes
S5	As a manager, I want each booking to hold a credit straight away, so that nobody books more sessions than they've paid for	A booking reserves a credit straight away, in one database function that also checks capacity (see Data model)	Opening day	
S6	As a manager, I want attendance and credits updated automatically after each session, so that balances are always right	Attendance and credit deduction run automatically after each session (a database job every 15 minutes; see Scheduled jobs)	Opening day	

#	User story	Requirement	Release	Notes
S7	As a manager, I want the app to carry The Village name and look with no demo passwords, so that it feels like ours and stays secure	The Village name, simple pastel look, demo passwords removed	Opening day	Final logo and colours later
S11	As a manager, I want to choose a class type or create a new one, and adjust each session's title, length and capacity, so that we can try new classes without changing the system	Class types from a list (Pilates, yoga, strength, fitness, dance) or new ones. Each session's title, length and capacity can change. Open play and private hire are set up as types too	Opening day	
M8	As a manager, I want to set up the packs we sell, with their size, price, validity and which sessions they cover, so that staff sell the right thing and customers' credits work automatically	Editable prices and packs: single-session price, pack size, price, validity and class types covered. Promotions as packs too (e.g. "10 + 1 free"), with optional start and end dates. Bonus credits for one customer, with a reason	Opening day	Agreed: single class 400,000 VND, open play 150,000 VND per child. Pack prices to come. Intro pack: 3 classes for 750,000 VND, one per new customer, sold by a manager. Price changes apply to new sales only

#	User story	Requirement	Release	Notes
S14	As a manager, I want every payment recorded with its method and amount, so that the money received matches what we sold	Record payment method (cash, bank transfer, QR) and amount for every pack sale, drop-in and private hire	Opening day	
S15	As a manager, I want to give a new customer a free trial class, so that they can try The Village before buying a pack	Managers can give a customer one free trial class	Opening day	Shows in reports as a zero-price one-off
S17	As a manager, I want to cancel a session for everyone in one step, so that customers get their credits back and are told straight away	Cancel a session: bookings cancelled, credits returned, everyone emailed	Opening day	For instructor illness, floods and similar

#	User story	Requirement	Release	Notes
S25	As a manager, I want to be told when a new customer signs up and books, or anyone books an unpaid drop-in, so that I can call them, welcome them and make sure they pay on the day	Managers get an email and a dashboard list of new customers and unpaid drop-ins to call, to avoid no-shows. Bookings stand straight away (no pending state); the manager ticks "Called", or cancels the booking if needed; a manager records payment at check-in, paid by QR code before the session	Opening day	Staff can also give a free trial or sell a pack on the spot
W1	As a parent finding The Village online, I want a simple page that explains it with a Book now button, so that I can understand it and book straight away	One-page public website with a Book now button. Facebook and Instagram link to the same booking page	Opening day	

#	User story	Requirement	Release	Notes
W2	As a parent searching nearby, I want to find The Village on Google Maps and book from there, so that I can go from discovering it to booking in one step	Google Business Profile with photos, opening hours and a "Book" button on Google Search and Maps. The button opens the timetable directly (e.g. book.thevillagesaigon.com), where a parent can book as a guest (C15) in a few taps. Ask the first customers for reviews	Opening day	Set up by the owners, not development. Google's verification can take days, so start as soon as the address is final. Booking entirely inside Google ("Reserve with Google") only works through Google's approved booking platforms such as Mindbody or ClassPass, not a custom app, so the Book button links out to our site

#	User story	Requirement	Release	Notes
B1	As a parent, I want to know how my family's data is used and be able to ask for it to be deleted, so that I can trust the studio with it	Privacy policy page and a way to request data deletion	Opening day	Vietnam has GDPR-like rules: Decree 13/2023 on personal data protection, and, as far as we know, a Personal Data Protection Law in force from 1 January 2026. They need clear consent, extra care with children's data, and handling requests to see or delete data. Owners checked: hosting in Singapore needs no filing (Developer notes, Security and access)
B2	As a customer, I want the cancellation and booking rules in plain words, so that I know where I stand	Terms and cancellation policy page	Opening day	From the business rules agreed at the meeting

#	User story	Requirement	Release	Notes
P1	As the owners, we want The Village's data kept in its own database on paid hosting with backups, so that the system is reliable and private	Separate database and website, paid hosting, daily backups, a staging copy, and one tested restore before opening	Opening day	
P2	As a customer, I want login emails to arrive quickly and not in spam, so that I can sign in first time	Own domain and a reliable email-sending service	Opening day	
P3	As the owners, we want automated tests on booking, credits and access, so that changes never break what customers rely on	Automated tests for booking, credits and access rules	Opening day	
S2	As a manager, I want to add and remove staff accounts, so that access stays right as the team changes	Page for managers to add and remove staff accounts	+2 weeks	At opening, the developer creates the accounts

#	User story	Requirement	Release	Notes
S18	As a manager, I want to swap the instructor on a session, so that cover is arranged without rebooking anyone	Change a session's instructor; both instructors' calendars update	+2 weeks	
M1	As a manager, I want to set opening hours and closed dates, so that nobody can book when we're closed	Opening hours and closures (Tet, public holidays), with the option to extend packs. Sessions already booked on a new closure date are cancelled with S17	+2 weeks	
M2	As a manager, I want to pause a customer's pack, so that illness, a new baby or travel doesn't use up their expiry time	Pause a pack, with a reason: the expiry date moves by the paused days, and the customer sees the pack as paused with its new expiry date	+2 weeks	Until then, staff edit the expiry date
M3	As a manager, I want to see money received by payment method each day, so that I can check it against the bank and the cash box	Money report by day and payment method, with weekly and monthly totals	+2 weeks	

#	User story	Requirement	Release	Notes
M4	As a manager, I want sessions taught and attendance per instructor each month, so that I can pay instructors correctly	Instructor report per month, exportable to a spreadsheet	+2 weeks	Needed before the first pay day
M9	As a manager, I want to change the booking rules and studio details myself, so that we can adjust them without a developer	Studio settings: cancellation cutoff, how far ahead and how late people can book, messaging links, contact details	+2 weeks	At opening, the developer sets the agreed values
M10	As a manager, I want to act on a customer's request to delete their data, so that we keep the promise in our privacy policy	Delete or anonymise a customer's personal and child data, keeping money records	+2 weeks	

#	User story	Requirement	Release	Notes
M7	As a manager, I want to put on one-off workshops and events, such as a talk by a child dietitian or psychologist, so that we can offer more than regular classes	One-off special sessions with their own title, description, picture, length (e.g. 2 hours), capacity and price. Booked per ticket and paid separately, not with pack credits. Shown on the timetable like any session	+2 weeks	Paid by transfer, QR or on the day and recorded by staff, like drop-ins. Can be moved to opening day if a workshop is planned for the first fortnight

Ideas for later

Pick Yes, No or Not sure for each idea. The Yes items are built after the two launch releases.

#	For	Idea	What it does	Want it after launch?
C13	Customers	Waitlist	Join a waitlist for a full session. When someone cancels, the first person gets the place and an email	▾
C24	Customers	Low-credit and expiry reminders	Email when 2 credits are left, or 2 weeks before a pack expires	▾
C23	Customers	Bring a guest	Use one of your own credits to book a place for a partner or friend	▾
S9	Staff	Online or staff booking shown	See whether a booking was made by the customer online or by staff	▾
S20	Staff	Message a session	Email everyone booked into a session, e.g. "bring a towel" or "starting 10 minutes late"	▾

#	For	Idea	What it does	Want it after launch?
M5	Managers	Discount codes	Codes customers enter for a lower price	▾
M11	Managers	Referral rewards	A discount or free class for bringing a friend	▾
M12	Managers	Gift vouchers	Buy a pack or a class as a gift	▾
M6	Managers	"How did you hear about us?"	One question at sign-up, to see which marketing works	▾
S10	Managers	Export to a spreadsheet	Download customers and balances to review or keep a copy	▾

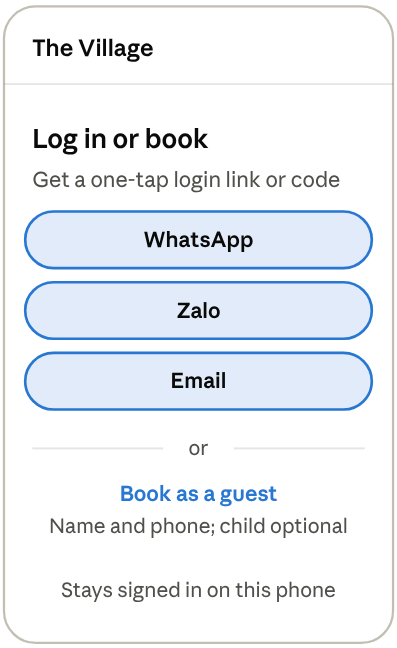

Not needed for now: separate bookings for children (until children's classes start), a terms, waiver and photo consent tick at booking (C21, cut from scope), online payment (not this year), an App Store / Google Play app (not planned; the mobile site covers it), online private hire requests (arranged by WhatsApp chat), Korean, Japanese and Chinese (most parents speak English).

Customer site wireframes

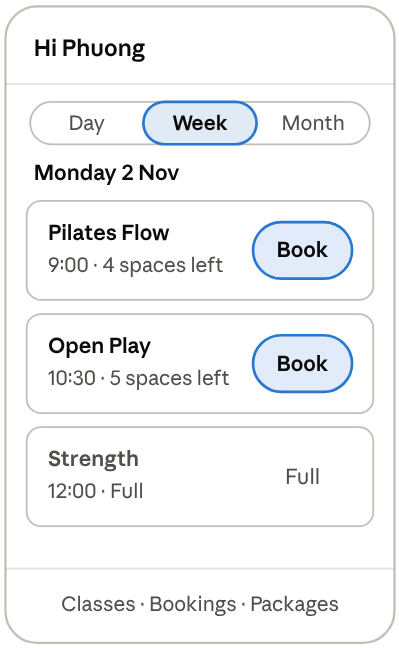

Three tabs (Classes, Bookings, Packages) and a private hire page. Booking takes three taps: open the link or QR code, tap Book, then Confirm.

Customers book a class in a few taps from their phone

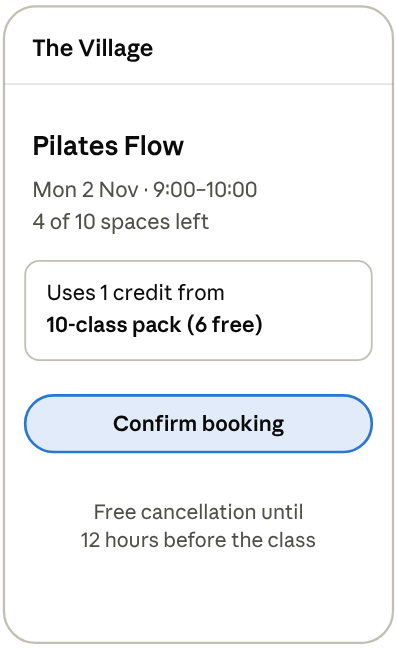

1. Log in, or book as a guest

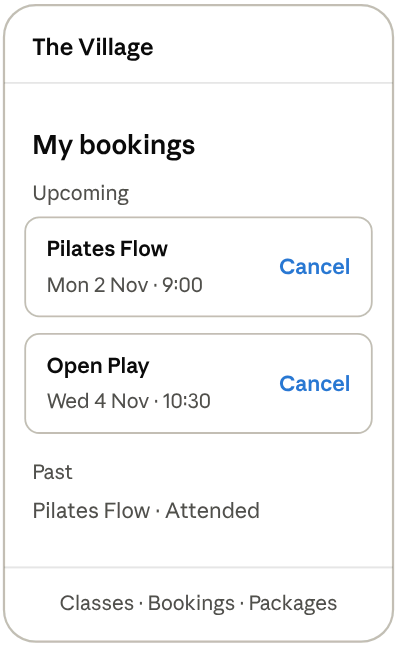

2. Timetable: day, week or month

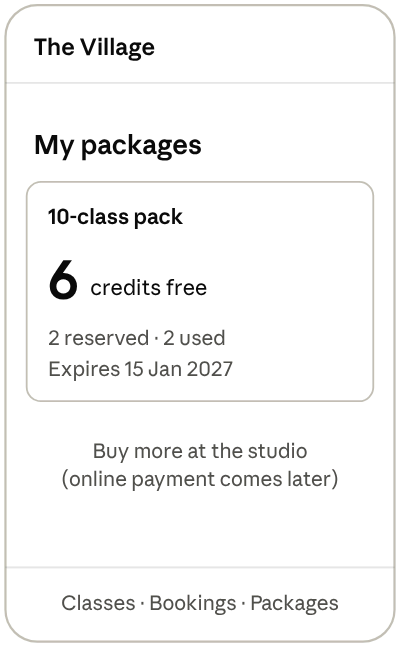

3. Confirm the booking

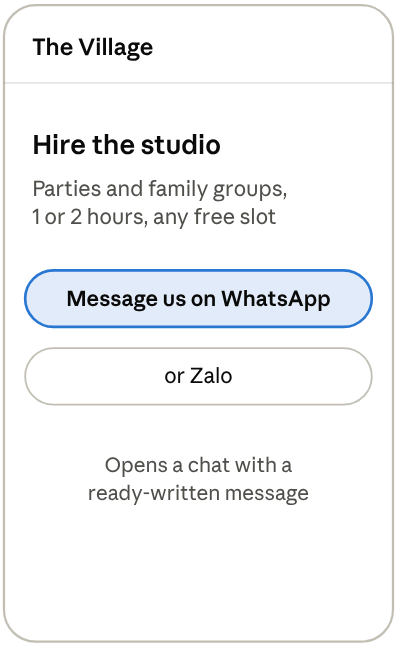

4. My bookings

5. My packages

6. Private hire: message us

Customer site wireframes · 6 phone screens

Layout and content only: names, times and numbers are examples, and the final design uses The Village's own colours and logo. Session pictures (C28) and the "Every week" option (C25) aren't drawn yet, and the guest form also needs the required email field.

Mockup vs requirements

On 20 October we clicked through the clickable mockup of the customer booking site, as a guest and as a logged-in member, and compared it with the requirements doc. The 16 differences are below. Codes such as C15 are requirement numbers in that doc. For each row, tick one box: **Requirements** (build as written), **Mockup** (change the requirements to match the mockup) or **Discuss**. The team's decisions from 21 October are in the Decision column, and the requirements have been updated to match.

Rule for the build: the requirements win unless a row is ticked Mockup. A row ticked Discuss, or not ticked at all, is built as the requirements say, and Claude Code lists it for the owners to decide during the design phase.

https://the-village-booking-test-oct26.tender-frog-8138.chatgpt.site/

#	Topic	What the mockup does	What the requirements say	Why it matters	Suggested	Decision
1	People per booking	"Who's coming" lets one booking include up to 2 adults and several children, and adds up the total	A parent books one place for themselves, and one child is assumed to come with them. Bringing a partner or friend is an idea for later (C23)	Changes how places are counted, what a booking costs and how many credits it uses	Requirements for launch; revisit with C23	☑ Decided 21 Oct: 1 parent and up to 2 children per booking. Requirements updated
2	Open play price and capacity	150,000 VND per child, "child places left", up to 2 adults included free	Booked like a class: one place per parent, 150,000 VND or one open play credit, 10 parents per session	Siblings and second adults change revenue and how full the room gets. This is a pricing decision for the owners	Discuss	☑ Decided: 150,000 VND (1 credit) per child, up to 2 parents free. Requirements updated
3	Weekly bookings (C25)	The customer picks specific dates (e.g. the next 4 Mondays); nothing continues automatically	"Every week" holds the same place until cancelled, booked 4 weeks ahead on a rolling basis, with a cap on weekly places per class. Second release	A rolling booking keeps regulars' places without rebooking; picking dates is simpler to build	Discuss	☑ Mockup: pick dates one by one (any pattern); no automatic weekly series. Requirements updated

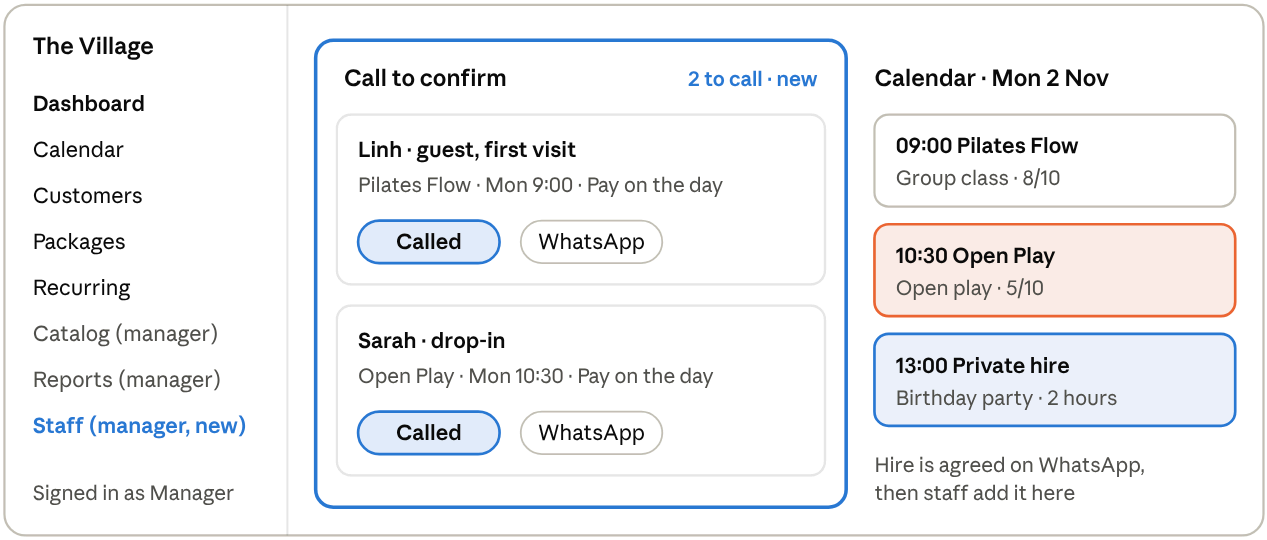

#	Topic	What the mockup does	What the requirements say	Why it matters	Suggested	Decision
4	Unpaid guest bookings	A guest can reserve several dates at once, all paid at the studio	New customers get one unpaid "Pay on the day" booking at a time, flagged for a manager to call (S25)	Several unpaid places can block a class if the guest doesn't turn up	Requirements	☑ Decided: guests 1 unpaid booking at a time; logged-in customers can book several. Requirements updated
5	Guest details (C15, C22)	First name and email only	Name, phone (WhatsApp) and email required; child's name and month/year of birth optional	The manager needs the phone number to call new customers; the child's age helps instructors	Requirements	☑ Requirements
6	Private hire (C29)	A form (date, start time, 1 or 2 hours, group size up to 15) that produces a message to download; says 48 hours' notice	A "Message us about private hire" WhatsApp button with a pre-filled message, plus Zalo. No online requests. 24 hours' notice was agreed	Downloading a message is awkward on a phone, and the notice period must match the agreed rule	Discuss: keep the form, but send it as a pre-filled WhatsApp message	☑ Decided: keep the form; it opens WhatsApp or Zalo pre-filled; 24 hours' notice. Requirements updated
7	Message us buttons (C26)	None	Zalo, WhatsApp and Facebook Messenger buttons	Lets parents ask a quick question in the app they already use	Requirements	☑ Requirements
8	English/Vietnamese switch (C10)	None; English only	English by default, with a Vietnamese switch on the website, booking site and emails	Local parents need Vietnamese	Requirements	☑ Requirements; Vietnamese isn't a launch blocker
9	Timetable views (C2)	A week list with previous and next arrows	A switch for day, week and month; week is the default; month shows a calendar with dots on days that have sessions	Month view helps parents plan ahead; week covers most needs	Discuss: could drop day and month to save time	☑ Mockup: week list only. Requirements updated

#	Topic	What the mockup does	What the requirements say	Why it matters	Suggested	Decision
10	Session details (C20)	Description, length, suitable ages, teaching language	Also the instructor and what to bring	Parents often choose by instructor	Requirements	☑ Requirements
11	WhatsApp login (C30)	Enter a phone number, then type a code	Tap "Log in with WhatsApp", WhatsApp opens with a ready message, tap Send, logged in	WhatsApp codes can't autofill on a website, so typing a code is the slower path. Needs Meta approval; email codes cover opening day	Requirements	☑ Mockup: phone number, then a 6-digit code. Requirements updated
12	Full class	"Join waitlist"	Waitlist is an idea for later (C13), not yet voted on	Extra work: deciding who gets a freed place and emailing them	Discuss in the Ideas vote	☑ Requirements: no waitlist at launch
13	Changing a booking	Help text says customers can move a booking to another date	Customers cancel before the cutoff to get the credit back, then book again (C4)	Moving dates is extra logic and screens	Requirements	☑ Requirements. The cutoff time is now an open question
14	Late cancellation of an unpaid drop-in	Booking policy says the full price is due after the 12-hour cutoff	A late cancellation uses the credit; nothing is agreed for unpaid drop-ins	Hard to collect money from someone who didn't come; the wording must match what staff will do	Discuss	☑ Decided: no late fee at launch; phase 2. Requirements updated
15	"Pay now 0 ₫" line	Shown in every booking summary	No online payment this year	Suggests customers could pay online	Requirements: remove the line	☑ Requirements: remove the line. When to take payment is now an open question
16	Privacy policy link (B1)	None	Privacy policy page and a way to ask for data deletion	Needed under Vietnam's data rules (Decree 13/2023), especially for children's data	Requirements	☑ Requirements

Staff dashboard

A starting sketch only: the staff dashboard is designed from scratch in the design phase. Its key feature is a "Call to confirm" list of new customers and drop-ins.

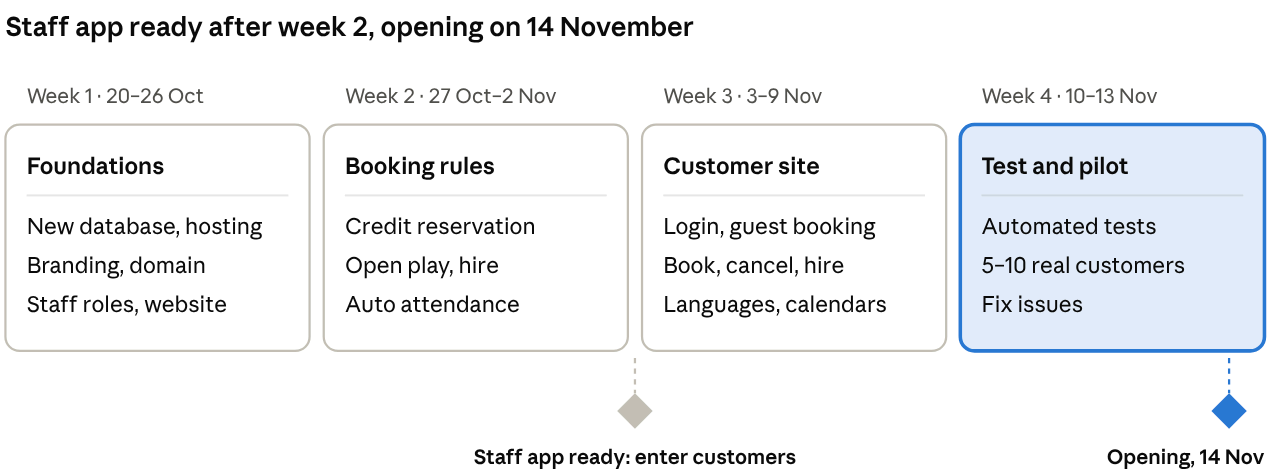

Managers call new customers and drop-ins from the dashboard

Staff dashboard wireframe · call-to-confirm list and session types

Timeline and cost

Order of work: wireframes and visuals, owner sign-off, then coding (How we build, Developer notes). The hours below assumed reusing an existing app and will be re-estimated for a from-scratch build once the designs are signed off. Two releases: **opening day on 14 November** (about 53–85 hours of work, or 15–24 a week from 20 October), then the "+2 weeks" rows about two weeks later (about 23–38 hours). The staff side is ready first so staff can load customers and packs, and a few customers pilot the site the week before opening. If the build runs late, the customer site switches on after the pilot. After that come the ideas marked Yes.

MVP plan · 4 weeks, 2 milestones

Running costs: about $76–87 a month for the database, hosting, email and domain (checked 20 October). Details are in Developer notes.

Domain

thevillagesaigon.com is available (about $10–20 a year) and is the pick: the website at the main address and the booking site at book.thevillagesaigon.com. Buy it soon, and check the matching Facebook and Instagram handles.

WhatsApp and Zalo setup

The "Message us" buttons need no approval and go in for opening day. Logging in with WhatsApp or Zalo needs Meta and Zalo to verify the business first, so the owners should apply now; email codes cover opening day if approval is late. Costs and timings are approximate, from memory, not checked online (18 Oct).

Step	Who	WhatsApp	Zalo
1. Message us buttons (C26, C29)	Developer	A wa.me link with a pre-filled message, to the studio's WhatsApp Business app number	A zalo.me link to the studio's Zalo or its Official Account
2. Business account	Owners	Meta Business Portfolio at business.facebook.com	Zalo Official Account at oa.zalo.me

Step	Who	WhatsApp	Zalo
3. Verification	Owners	Business verification with the company registration certificate and the website or domain email; days, sometimes weeks	Official Account verification with the business licence; verified tiers are paid packages
4. Sending setup	Owners	A phone number on the WhatsApp Business Platform, with the display name "The Village" approved	A Zalo Cloud Account wallet, prepaid for messages
5. Connect the booking site	Developer	WhatsApp Cloud API: the site sends the login code with an approved authentication template	ZNS login-code template (approved in a few working days)
Cost per login		Meta's login-code (authentication) messages, a few US cents or less each	ZNS roughly a few hundred VND a message

How WhatsApp and Zalo login work (decided 21 October). The familiar "phone number, then code" pattern:

1. The parent taps Log in with WhatsApp (or Zalo) and enters their phone number.
2. The Village sends a 6-digit code to that number on WhatsApp (Meta's login-code message, with a Copy code button) or on Zalo (ZNS).
3. The parent copies or types the code on the booking site.
4. They're logged in on that phone, and the phone number is now verified.

Zalo options. ZNS sends a code to the parent's Zalo by phone number; a Vietnamese provider such as eSMS, Stringee or VietGuys can speed up setup. A "Log in with Zalo" button isn't needed now that login is phone number plus code.

Order: message buttons and email codes on opening day; WhatsApp login once Meta approves (expat parents, near-zero cost); then Zalo for local parents. SMS stays optional.

- [ ] Are the company registration papers ready for Meta and Zalo verification?

Website one-pager

One scrolling page in English and Vietnamese, built on the idea that parents shouldn't have to choose between looking after themselves and their children. Deliberately simple: a full-width photo header with a clear headline, Facebook and Instagram icons in the header and footer, and no prices or how-it-works section. Every Book now button, the social links and the Google Maps listing open the booking site.

A simple one-page site: a photo, the story, what's on, then Book now

The Village · Family Club f IG EN · VI **Book now**

Full-width photo of a class

Pilates and movement for mums and little ones

Move. Connect. Belong. Bring your children along.

Book a class See the timetable

It takes a village to raise a child

Parents shouldn't have to choose between looking after themselves and their children.

So we built exercise around parenthood: proper classes, with your little ones playing, exploring or simply close by. Not a gym, not a play centre. A place designed with you in mind.

Move
Pilates, yoga, strength, fitness and dance, worth doing in their own right

Connect
Children stay close. Meet parents at your stage over coffee, workshops, events

Belong
Made for this stage of life. Arrive with your baby, no awkwardness. You belong here.

Made with mums and young children in mind. Dads, expectant parents and families are welcome too.

What's on

Classes
Pilates, yoga, strength, fitness, dance.

Open play
Play time for parents and kids

Private hire
Hire the whole studio: message us on WhatsApp

Coming soon: workshops on parenting and baby health and safety, and events for the whole family.

What parents say

"Quote from a parent"
First name, mum of one

"Quote from a parent"
First name, mum of two

"Quote from a parent"
First name, dad of one
